It was Sunday the 14 Oct 2018, a rather cool Sunday.
The clock clicked at 03.37, it was far too early to do
anything sensible. I laid in bed wondering about Quack,
Quack, Quack.

About 05.00 am the bus roared and I started a journey.
There was no bus at Plaine Verte so I ditch the Bus and
took to the walk, the clock clicked, and clicked at nap 05.30.
The road of Desforge street the dirtiest road in the Southern
hemisphere took a gloomy perspective. I strolled and visited
the Municipality of Port Louis. A gigantic ship filled the
harbour, lots of metal and steel, but it floats — I
walked pass the Treasury building, an old stone building
constructed to last for ever.

The Bus to phoenix roared towards the traffic lights
It was 06.00 am. There were a few odd travellers, early
birds and men with beard. The view was excellent.
There seem to be progress on the Motorway. Soon I
was at Phoenix. A great down. I had a tyket
for a bunch of bananas but the guy said they

Were not for sale. I bought a mole of chicken and walked towards the major disaster at the WTD center. The natural layer that took years to salvage was dugged out and the ugly lanterlike and motherly poured into the environment as a waste.

I arrived at the Sodor Sodcan. It was a deserted place. Soon to be filled with love. loving souls.

The came kicked in It was non-medical preslusly and followed by leadership, management and enterprise, a lookshow Log Hardare and and file case —

The day ended — we dragged home — I spend most of the day room time logtify a beautiful angel. A dehlic human. I was hungry for love and I must say, I was weaked at his knee and very strong above his knee. whAn delight—
